

Dynamics NAV/Business Central Health Check 360 Review

Eagle360 Health Check enables Dynamics NAV/Business Central customers to ensure they are getting the best value out of their solution. A 360 degree review of each module in use allows customers to ensure that they have the correct setups in place to minimise errors and maximise efficiency of the system. Often business values have changed since their initial implementation of Dynamics NAV and a health check allows customers to evaluate if they are getting the best out of their system as well as explore additional functionality that would benefit your business.

1. Module Setups

The 360 review process delves deep into Dynamics NAV system to the core setup areas of each module in use by your business and ensures that nothing has been missed that is currently causing any problems or could cause irregularities in the future.

2. User Feedback

Your Dynamics NAV/Business Central users often have many questions and or suggestions on how they feel the system would be better for their job functions and the health check is a forum for them to voice their opinions. This enables our experienced consultants to work with their queries and determine a suitable course of action to address their concerns and enable them to work productively every day getting the most out your Dynamics NAV/Business Central investment.

3. Performance Tuning

Reporting and Posting performance can often cause disruptions to users productivity and the 360 degree review investigates system slow-downs and offers assistance in getting the system back to its speedy posting and reporting just like new.

4. Environment Review

Your server environments can often be the cause of system slow downs and budget overruns in maintenance costs. The health check environment review checks all your database and server

configurations to ensure that everything is updated and working as it should. Any issues can be documented and reviewed for maintenance at suitable times to prevent system outages

5. System Requirements

Microsoft Dynamics NAV 2013 R2, Microsoft Dynamics NAV 2015, Microsoft Dynamics NAV 2016, Microsoft Dynamics NAV 2017, Microsoft Dynamics NAV 2018, Microsoft Dynamics 365 Business Central.
